

# RA240 Solar Max

(available today from Clean Energy International)

The Model RA240 Solar Max is a highly efficient air heating system. It provides, at almost no cost, environmentally friendly heat to your home or business especially during the cold months of the year.

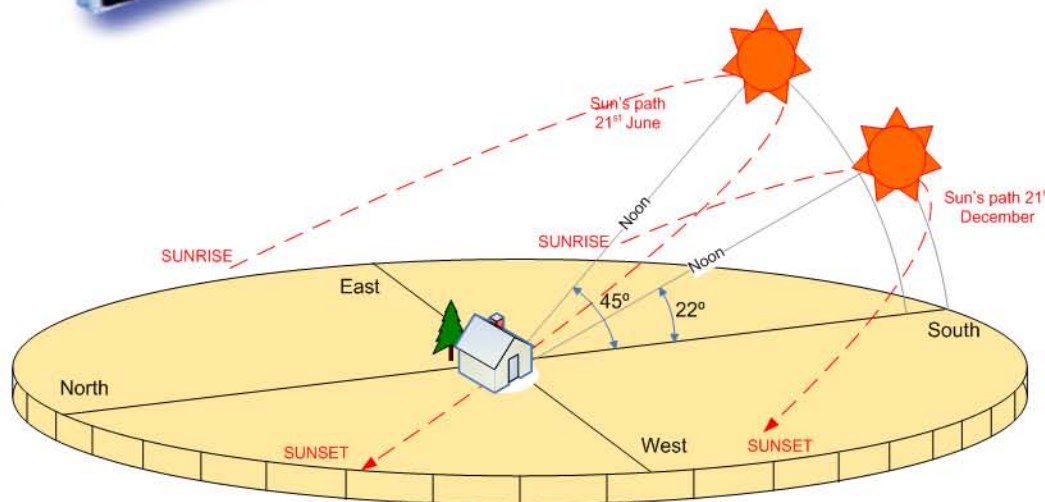

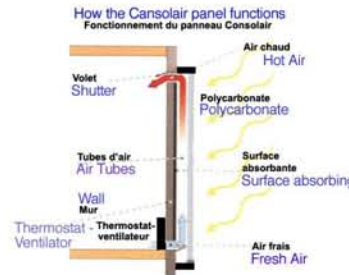

Solar Max is installed on any southerly wall free from shadow. The solar diagram shows how the lower sun angles in the colder latitudes makes wall mounting more efficient than roof mounting. Call CEI for more details

## Benefits

The RA240 Solar Max reduces heating bills by harnessing the sun's energy to augment existing heating systems. Some of the key benefits are that the Solar Max is:

- An affordable alternative to traditional energy sources
- A Reliable no-cost heating system
- Environmentally friendly (no Green House Gas emissions)
- Maintenance free
- Thermostatically Controlled
- Easy to install
